

## Data Governance

We work with you to support your data governance, master data management, metadata, data classification, and data quality processes.

- Identify your data assets
- Establish a data stewardship process
- Understand the flow of data across your enterprise
- Establish data standardization rules
- Implement a master data management strategy
- Identify data security requirements
- Establish enterprise or organizational data models and data dictionaries

# Data Services

## Data Analytics and Informatics

Data analytics is the process of examining data sets to draw conclusions about the information they contain, increasingly with the aid of specialized systems and software.

Since 2004, we have been providing our clients with Agile management, staffing, and consulting services for the implementation of large-scale, multi-year, and multi-vendor Healthcare Modernization, Informatics, and Data Transformation projects. We have successfully implemented many projects for Medicaid Enterprise Systems, including but not limited Enterprise Data Warehouse (**EDW**), Decision Support System (**DSS**), Predictive Visual Analytics (**Data Science, AI, ML**), and Data Analytics and Reporting (**DAR**).

We work with you to manage and maintain the compliance with regulations, Service Level Agreement (SLA), and key performance indicators (KPIs).

*We provide support and services to you during HIPAA, NIST 800 or CMS certification / auditing activities.*

We provide process improvement and Enterprise Agile DevSecOps delivery framework to ensure high success rate with quality results, always.

## Data Visualization

VTPMO provides enhanced analytics and visualization solutions that will provide you the capabilities to make informed business decisions that will meet and improve the Enterprise goals and outcomes within privacy and security regulations.

- We work with you to overcome issues with data literacy, design, and data models to create impactful visualizations.
- We help to drive improvements in care and reduction in operational costs.
- We help you reach goals through data governance framework, data cleansing and visualizations, while ensuring you are creating a bigger impact with greater efficiencies.

*Regardless of your data source or format, we can help you to standardize the data and create useful visualization for effective and efficient decisions.*
