- ⚡ Jira Service Management
- ✕ Confluence

# What is Team Agile Transformation?

Agile Transformation happens at the team level

Train and coach agile team on Agile practices such as Scrum and Kanban

Structure the team with Scrum Master, Product Owner, and Developers

Each Agile Team works on a certain product to deliver, incrementally

Each Agile Team reports their progress to the management

This is a good starting point; however, it has many challenges to scale up to reach to the **Enterprise Business Agility** goals!

# What is Missing with Team Level Agile Transformation?

## Team of Teams (ART/Program)

Impediments  
Risks  
Dependencies  
End-to-end Tracking

Mature Portfolio, Product, Solution, and Program Agility

Improve Operations, Compliance, Legal, Finance, and Human Resources Agility

Leadership Involvement - Agile Change Agents

Map Operations to Solutions, and Map Solutions to Teams

Enterprise Ecosystem Framework for End-to-End (E2E)  
Planning, Tracking, Metrics, Dashboards, and Transparency

# What is Scaled Lean-Agile Transformation?

# Enterprise Business Agility

**A>****INTEGRATION**

The knowledge base of proven, integrated principles, practices, and competencies for achieving Business Agility by implementing Lean & Agile at scale

**B>****INNOVATION**

Business agility is the ability to compete and thrive in the digital age by quickly responding to market changes and emerging opportunities with innovative business solutions.

**C>****INVOLVEMENT**

Business Agility requires that everyone involved in delivering solutions using Lean and Agile practices to continually deliver innovative, high-quality products and services faster than the competition.

# Enterprise Agile Ecosystem Framework

## Definition

- A set of well-connected toolchain that provides real-time planning, collaboration, automation, transparency, metrics, and quality across teams, programs, products, solutions, and portfolios
- It is the foundation is the Triad of People, Framework, and Toolchain

## Key Benefits

- 1.Transform how you work to improve employee engagement, time-to-market, team productivity, and the quality of your products and solutions.
- 2.Consistent Agile practices across the organization
- 3.Improve governance, standards, and readiness
- 4.Improve and sustain maturity and metrics
- 5.Reduce lead time to value
- 6.Reduce vulnerabilities and defects

# Enterprise Agile Ecosystem Triad

The foundation of Scaled Lean-Agile Transformation and the resulting Enterprise Ecosystem is a **Triad of People – Framework – Toolchain** all in balance and synchronized with each other based on each organization's unique needs, structure and business objectives.

Agile Transformations that struggle typically do not fully consider and address the Triad. Resulting in sub optimal results and failed adoption across the teams where it is deployed.

We can help you utilizing the Triad to accelerate and sustain your organization's Agile transformation.

Aligning people, work, and strategy

# Agile Ecosystem Framework Benefits

Align your business strategy to technical execution teams

Optimize the delivery practices for customer value

Get real-time visibility and transparency

Provide focused dashboards for

- Executives (Strategic Planning and Monitoring)
- Portfolio Managers (Lean Portfolio Management)
- Program / Solution Managers
- Product Managers (Product Taxonomy and Applications)
- Agile Delivery Teams (Scrum / Kanban)
- ePMO (Agile Program Management Office)
- Objectives and Key Results Management (OKRs)
- Dev and Ops Teams
